

SUTD 2021 50.003 Quiz 3

James Raphael Tiovalen

Q1 – Multi-Threaded Summation

The code implementation is written in the included `quiz3.java` file.

Q2 – Multi-Threaded Median Finder

We can implement a parallel multi-threaded sorting algorithm (such as a bottom-up merge sort; sample code included) to sort the input array. After that, the globally sorted input array can be used to find the overall median.
